

**Climate and Health Environmental Engineering Research Solutions  
(CHEERS) Undergraduate Scholar Program presents**

# Undergraduate Summer Research Experience

***Looking for an opportunity to gain hands-on research experience  
in climate change and environmental justice in North Carolina?***

Apply to our Undergraduate Summer Research Experience, a ten-week summer research program hosted by University of North Carolina's Gillings School of Public Health and North Carolina A&T Department of Biology! Undergraduates from underrepresented minorities in STEM are strongly encouraged to apply!

- Design a research project with UNC and NCAT faculty who are leaders in interdisciplinary research on environmental justice and climate change.
- Receive a stipend of \$6,000, \$500 food stipend, travel allowances and housing.
- Attend professional development seminars and networking opportunities that can serve as pathways to graduate school.
